Czech	C2

AVAILABILITY

Full-time internship, February to June 2027 (17.5 weeks).

Game programming and design student at Digital Arts and Entertainment (Howest), specializing in game AI, engine programming, and graphics. Built a custom C++ engine, a Vulkan renderer, and AI systems ranging from Behavior Trees to flow field pathfinding. Seeking a programming internship for February to June 2027.

PROJECTS

Custom Game Engine, Q*bert C++

Built a small game engine from scratch for a Programming 4 assignment, then used it to recreate the first three levels of Q*bert, rendering, input, and game logic all self-written.

Graphics Programming C++, Vulkan, DirectX 11

A Vulkan renderer with glTF scene loading, a dual-mode rasterizer running both a hardware and a from-scratch software path, and a CPU raytracer.

Game AI Unreal Engine 5, Unity, C++, C#

Behavior Tree driven survivor AI, classic steering behaviors, and a flow field pathfinding system with a custom Dijkstra priority queue and live debug visualization.

Labyrintigo, team project Unity, C#

Shipped multiplayer PvP game built with a team of 6 students; owned labyrinth movement and power-up systems.

Allie Meet Alles, client project Unity, C#

Educational game built for an external client, shipped to WebGL for browser play.

Building games as a hobby since high school, early Python and tkinter experiments, an RPG Maker demo, and more, well before doing it professionally.

EXPERIENCE

Parkour Instructor, Skill Lab, Kosice 2021 - Present

Progressed from assistant to lead trainer running independent sessions; responsible for equipment upkeep.

Supervisor, Jump Arena, Kosice Jan 2023 - Present

Customer-facing role explaining activities to visitors and parents; regular English use with international guests.
